

# Dental Catalog - Equipment -

Ritter Dental: More than 137 years in dental experience.

The German Frank Ritter – founder of Ritter Dental and inventor of the first Dental Unit.

In 1887, Frank Ritter produced one of the world's first treatment chairs for the dental profession.  
In the 130 years since, Ritter Dental has produced a long line of products that has changed the face of dentistry.

1912 Ritter Dental introduced the "control panel" for the dental instruments, a major advancement and the beginning of modern technology in dentistry.  
In 1917 Ritter Dental introduced the integrated treatment system; chair with control panel, drill, cuspidor, saliva ejector, tray table and air/water syringes – all instruments in one unit.

**This system delivered for the first time the modern dental system, the core concept which has not changed even today.**

First Dental Chair / about 1900

Electric  
Chair Only

Ritter Dental™

## Chair Features

- Electric movement for smooth, quiet positioning
- Ergonomic design for comfortable seating during long treatments
- Broad space for dentist's legs
- High-quality seamless upholstery
- Auto return function:  
Safety switches  
If the safety switch is activated, the chair automatically moves up a few inches.
- Trendelenburg movement:  
Seat and backrest movement synchronized
- Left and right armrest
- Double-articulated headrest
- Load capacity of up to 135 Kg

## COMPLETE DENTAL UNIT

### The New Vanguard Smart Unit

The versatile new Ritter Dental Vanguard Smart is a German-engineered dental unit that unites electronic technology with a sleek, contemporary design. This unit comes with the excellent quality and features you have come to expect from Ritter Dental.

#### Standard Features

- Advanced traditional or continental delivery system
- Self-contained clean water system
- Assistant's instrument package
- LED operating light
- Patient chair with seamless upholstery
- Cuspidor with movable spittoon
- Load capacity of up to 135 Kg

## Stools

A long workday is comfortably mastered with good equipment. Ergonomic seating and precise illumination of your patient are the essential prerequisites for this.

- Backrest with fixed position or dynamic movement
- Ergonomic and comfortable seating
- Symmetrical backrest
- Gas lift cylinder
- Chrome legs
- Five dual casters for stability
- Color-matching upholstery available in multiple colors
- Available with or without foot ring

Doctor Stool

Assistant Stool

## Operating Lights

Best illumination where it is needed.

### EDI LED

The LED technology is the present and the future of lighting systems: the light is obtained by a flow of electrons that goes through a semiconductor material generating very little heat at constant light flow. Because of their simple design, LED lamps are virtually maintenance free, have a great luminous efficiency and incomparable durability.

- Light intensity: from 3.000 to 45.000
- Colour temperature: 5.000 Kelvin
- activated by joystick or sensor
- static heat sink (no fan required)
- Precise illumination of the working field 150 x 80 mm

### Maia Light LED

- Light intensity: 3.000 to 45.000 Lux
  - Colour temperature: 6.000 Kelvin
  - Cooling system: static heat sink (no fan required)
  - Automatic saving of the light intensity used, after shutting off the dental unit and after the rinse function.
  - The electronic lighting control can be activated by joystick, sensor or dental unit.
- It adjusts the light from maximum to minimum continuous intensity, while maintaining constant colour temperature.
- Working light field: 8 x 3.9" (at 28" distance)
  - Handles are removable and autoclavable

### EVA Sunlight LED

EVA Sunlight provides a new generation of Sunlike LED, to benefit from the illumination, colour rendering and well-being as similar as the natural sunlight. It drives the operator through tiny details for an increasingly reliable, efficient and comfortable view. The bright bulb on the head shows the level of illumination in use.

- Light intensity: 50.000 Lux
- Colour temperature: 5.000 Kelvin
- Working light field: 7.5 x 3.9" (at 28" distance)
- Handles are removable and autoclavable
- Rotation System: 3rd axis

### EVA Sunlight LED with Camera

EVA CAM is the operating lamp with integrated professional camera. The zoom is specific for dental practice to ensure direct and precise framing. The foot control allows no interruptive procedure to keep the attention on the operating field. EVA CAM is the best partner for constant and effective communication with the patient, colleagues and students and it enables a comprehensive and accurate record for diagnosis, treatment and traceability.

- Resolution 4K
- Video format MP4
- Photo format JPG
- Standard lens: 25mm
- Optional lens: 16mm

### Options for EVA Sunlight: EVA Ceiling Mount

### EVA Light Arm

Foot control for chair movements

Foot control for instruments

Foot Controllers

Designed for ease in chair movement

- Large foot control pad for easy repositioning
- Manual control of chair movements
- Up/down of backrest and chair

Foot control for chair movements

- Rinsing position/last treatment position
- Entry/exit position
- Three programmable chair positions

Foot control for instrument functions

- Speed/power control for the active instrument
- Water on/off mode instruments

Buttons

- Switch for instrument water
- button for chip air function

# Intraoral Camera

RITTER CAM

**A3W-X Intraoral Camera  
Mount and Monitor incl.**

## Digital intra-oral camera and monitor

With the Ritter intraoral camera, you can easily highlight pathological processes in the image and explain clinical measures in a simple way. This facilitates the dialog with the patient and prevents patient objections and concerns. Acceptance of the treatment is increased because patients are more involved in the process and thus quickly understand the importance of the planned treatment.

For you as a practitioner, this means more efficiency and productivity

### Technical specifications:

Power supply:	220 V or 24 V
Input Power:	4.5 VA~5.5 VA
Camera Lens Auto Focus:	15 mm~30 mm
Operating Range:	18 mm~25 mm
Handle Wire Length:	2 m
Image Format:	JPEG
View Angles:	62 degrees
Imaging Sensor:	CMOS sensor, 2.0 Mega Pixels
Resolution:	1280*1024 (30 fps)
Display Screen:	17"
Backlight:	10 LEDs; Support lights off

# MCX Micro Motor Kit

With Optima<sup>INT</sup> Display

## Perfect Control

Optima<sup>INT</sup> and its MCX micromotor guarantee perfect control of the tool, managing the speed and the reversal of the direction of rotation. Providing the ultimate speed and torque control, the Optima<sup>INT</sup> with Smart Logic technology is capable of exploiting to the fullest. Thanks to its Easy-Nav philosophy, the Optima<sup>INT</sup> is incredibly intuitive and adapts perfectly to Ritter Ultimate Comfort Line. The Optima<sup>INT</sup> interface has 10 preprogrammed sequences for restorative operations and 10 sequences for endodontic operations with MX2 micromotor. You can perform your root treatments in complete safety. The Optima<sup>INT</sup> has been designed to reduce the risk of NiTi instrument breakage to a minimum, by means of the auto-reverse function. The MCX with adjustable LED light is the smallest and lightest brushless micromotor ever designed by Bien-Air. With MCX, you'll benefit from an even better grip and balance, ensuring more precise movements and less fatigue during the day.

### Technical specifications MCX Motor:

Applications:	Restoration, Prophylaxis
Speed range:	100–40 000 rpm
Max. torque:	2,5 Ncm
Torque control:	No
Dimensions Ø:	21 x 42 mm
Weight:	78 g
Endo functions:	No
Light:	LED
Autoclavable:	Yes
Hose attachment/rotation:	Screws / ± 200°

### Available options:

- Optima<sup>INT</sup> with 1 MCX LED motor
- Optima<sup>INT</sup> with 2 MCX LED motors
- Optima<sup>INT</sup> with 1 MX2 motor
- Optima<sup>INT</sup> with 2 MX2 motors

# MX2 Micro Motor Kit

With iOptima<sup>INT</sup> STANDARD

## Endodontics. Restauration. Prophylaxis.

iOptima<sup>INT</sup> and its MX2 micromotor is the all-in-one solution that offers the full range of treatment options and is seamlessly integrated into the Ritter Dental Vanguard Line. You no longer need any additional equipment: iOptima<sup>INT</sup> can be used to perform restorative procedures and endo treatments.

The system can be easily controlled via an Apple® iPad mini tablet \*. The iOptima<sup>INT</sup> therefore requires little space and guarantees a perfectly functional working environment. Highly versatile, the iOptima<sup>INT</sup> enables you to perform most of your dental procedures.

The Bien-Air MX2 carbonless micromotor with adjustable LED light is a little overachiever. The result is exemplary balance and comfort: constant power, perfect control of speed, torque and reversal.

### Technical specifications MX2 Motor:

Applications:	Restoration, Prophylaxis, Endodontics
Speed range:	100–40 000 rpm
Max. torque:	3,5 Ncm
Torque control:	Yes
Dimensions Ø:	21 x 44 mm
Weight:	79 g
Endo functions:	Yes
Light:	LED with adjustable light intensity
Autoclavable:	Yes
Hose attachment/rotation:	Screws / ± 200°

Available options:  
iOptima<sup>INT</sup> with 1 MX2 motor  
iOptima<sup>INT</sup> with 2 MX2 motors

\*iPad mini not included

# MX-i Micro Motor Kit

With iOptima<sup>INT</sup> ALL-IN-ONE

## Implantology. Surgery.

iOptima<sup>INT</sup> is the All-in-One solution offering you the full range of treatment options seamlessly integrated into your dental chair. No need for additional equipment anymore: iOptima<sup>INT</sup> lets you perform your restorative procedures, endo treatments (incl. reciprocating mode) and surgical procedures incl. implant placement. A Piezo scaling function is included as well.

Installed directly into the existing dental unit, the system is easily controlled through an Apple® tablet. The iOptima<sup>INT</sup> therefore requires minimal space and guarantees a perfectly functional working environment.

MX-i LED micromotors are first and foremost a model of stability. At both high and low speeds, they offer enhanced working comfort and their high torque copes with the most complex implant insertion procedures. Depending on the desired speed, the power is constantly adapted in order to provide the optimum result.

### Technical specifications MX-i Motor:

Applications:	Implantology, Surgery
Speed range:	100–40 000 rpm
Max. torque:	6 Ncm
Torque control:	Yes
Dimensions Ø:	23 x 69 mm
Weight:	115 g
Light:	LED with adjustable light intensity
Autoclavable:	Yes
Hose rotation:	0°

\*iPad mini not included

## Chiopro 3rd Gen Implant System.

Simplicity – the keyword of the new range of products developed by Bien-Air Dental in the field of implantology and oral surgery motors. Are you a dentist and/or specialized in implantology and looking for a simple, fast and efficient solution for your daily procedures? The Chiopro is the ideal solution for precise, reliable implant placement.

### Technical specifications:

Intuitive navigation: a single rotary knob for control  
Removable and sterilizable knob  
5 programs freely programmable  
Torque control  
MX-i LED micromotor with ceramic ball bearing  
Maximum torque: 70 Ncm  
Set includes:  
1 x console Chiopro 3rd Gen 1x contra-angle CA 20:1 L  
Micro-Series  
1 x MX-i LED 3rd Gen micromotor with 3 years warranty  
1 x cable MX-i LED 3rd Gen  
1 x foot pedal  
1 x handpiece holder  
5 x irrigation cables  
2 x sterile protective foils

Ritter ProCure

- Wireless
- Three working modes: Full, Ramping, Pulse
- Curing light up to 50 seconds
- Constant light intensity.  
The solidification effect is stable.

Technical specifications:

Rated Voltage:	24 V~
Rated Input:	≤8 W
Power:	from 1000 mW/cm <sup>2</sup> to 1200 mW/cm <sup>2</sup>
Light source:	blue light 385–515 nm
Working conditions:	
Environment temp.:	5 °C to 40 °C
Relative humidity:	30 %–75 %
Dimension:	26x25x260 mm
Weight:	135 g

Dental Ultrasonic Scaler LED Handpiece

The autoclavable LED handpiece with a light source of 100,000 lux guarantees perfect visibility of the surgical area and is ideal when working with the loupe. Cold light is used for better differentiation of soft tissue types. Thanks to innovative air supply system, the filtered air is fed directly to the tip at low directly to the tip – for thorough cleaning of the root canals of the root canals.

Technical specifications:

Frequency of oscillation:	≤ 28 KHz
Amplitude of the approach:	≤ 200 μm
Illuminance:	100,000 lux
Color temperature:	6,000-7,000 Kelvin
Length:	113 mm
Weight:	55 g
Handpiece cable:	2000 mm +/- 50 mm
Scaler Tips:	Satelec 1, 2, 10P

Ritter Compressor RA 7/3 D (Dryer)

Features:

- Oil free
- Adjustable pressure
- Auto stop and restart
- Air tank internal surface epoxy treatment
- Low maintenance
- Thermally protected
- Low running costs

Advantages:

- Lower noise level
- Compact layout and smart design
- Competitive price
- Secure handling
- Constructed for continuous duty
- Options available: Tank volume, Silent cabinet

Technical specifications:

Power:	3 HP via 3 pumps
Rotational speed:	1400 rpm
Tank:	80 Liter (18 Gallons)
Conveying capacity:	456 Liter (100 Gallons) Minute
Sound pressure:	56 dB (A)
Users:	5 to 6
Operating voltage:	220 V
Dimensions:	920 x 425 x 725 mm (36,2" x 16,7" x 28,5")
Weight:	78/90 kg (172/198 lb)

Ritter Compressor RA 7/4 D (Dryer)

Features:

- Oil free
- Adjustable pressure
- Auto stop and restart
- Air tank internal surface epoxy treatment
- Low maintenance
- Thermally protected
- Low running costs

Advantages:

- Lower noise level
- Compact layout and smart design
- Competitive price
- Secure handling
- Constructed for continuous duty
- Options available: Tank volume, Silent cabinet

Technical specifications:

Power:	4 HP via 4 pumps
Rotational speed:	1400 rpm
Tank:	135 Liter (30 Gallons)
Conveying capacity:	608 Liter (134 Gallons) Minute
Sound pressure:	56 dB (A)
Users:	7 to 8
Operating voltage:	220 V
Dimensions:	1070 x 460 x 750 mm (42,1" x 18,1" x 29,5")
Weight:	91/114,5 kg (201/252 lb)

MGF 100/50 TANDEM PRIME M

Features:

Prime oil-free compressors equipped with adsorption air dryers provide pure air with 0,01 micron filtration and -40°C dew point at atmospheric pressure, in conformity with the International Standards in matter of compressed air quality. These versions are suitable for food and medical industry, in general can be used in all the applications where an excellent purity of compressed air is required.

Technical specifications:

Power:	6 HP
Tank:	90 Liter (24 Gallons)
Air capacity:	450 Liter (119 Gallons) Minute
Pressure max:	10 bar
Sound pressure:	69 dB (A)
Users:	6 Maximum simultaneous
Dimensions:	1230 x 630 x 820 mm (49" x 28,5" x 40,2")
Weight:	118 kg (260 lb)
Available as:	220 V/60 Hz / single Phase 230-400 V/60 Hz / 3 Phase

MGF 200/75 PRIME M

Features:

Prime oil-free compressors equipped with adsorption air dryers provide pure air with 0,01 micron filtration and -40°C dew point at atmospheric pressure, in conformity with the International Standards in matter of compressed air quality. These versions are suitable for food and medical industry, in general can be used in all the applications where an excellent purity of compressed air is required.

Technical specifications:

Power:	9 HP
Tank:	200 Liter (53 Gallons)
Air capacity:	660 Liter (174 Gallons) Minute
Pressure max:	7 bar
Sound pressure:	72 dB (A)
Users:	9 Maximum simultaneous
Dimensions:	1450 x 820 x 900 mm (57" x 32,3" x 35,4")
Weight:	183 kg (403 lb)

Metasys Excom Hybrid 5 Suction Unit 1,5/1,75 Kw

Features:

- Centrifugal separation rotor
- Frequency-controlled suction power regulation
- Aluminium turbine wheel
- High wastewater outlet
- One motor shaft
- Airflow-optimized cooling fins
- Low running costs

Advantages:

The suction power of dry suction motors, combined with integrated air/water separation and different, optional amalgam separator modules are the cornerstones of a central suction system, marked by its flexible and individual structure, high level of user-friendliness, and its unobtrusive yet efficient technology. The EXCOM hybrid can be used as a dry as well as a semi-wet suction system makes it so unique.

Technical specifications:

Power supply:	230 V AC
Frequency:	50/60 Hz
Max. current consumption:	9,0/10,0 A
Max. electrical shaft power:	1,5/1,75 kW
Max. ambient temperature:	40 °C
Airflow rate:	2000/2400 l/min
Negative pressure regulated:	180 mbar
Noise level:	64/68 dB(A)
Noise level with cover:	51/54 dB(A)
Dimensions (H x W x D):	620 x 460 x 455 mm
Dimensions with cover (H x W x D):	785 x 500 x 550 mm
Weight:	30 kg (66 lb)
Weight with cover:	67 kg (148 lb)

W&H Lexa MN-111

Features:

- User-friendly interface
- Customizable drying time
- Large capacity sterilizer
- Versatile sterilization program options
- Superior vacuumassisted drying
- Meets stringent hygiene standards
- Easy maintenance
- Programmable cycle start
- Excellent value for money
- Automatic digital cycle recording on USB stick
- Automatic water filling (optional)
- User authentication and load release (optional)
- Barcode label printing (optional)

Technical specifications:

Chamber size:	28 liters (7.4 gal)
Main/Used water tanks:	6.4/6.7 liters (1.7/1.8 gal)
Connection types:	2 USB ports 1 Ethernet port (optional)
Power supply:	100–125 V AC; 50/60 Hz 12 A Single Phase
Dimension (W x H x D):	490 x 452 x 616 mm 19.3" x 17.8" x 24.3"
Weight (empty):	48 kg (105.8 lbs)
Sterilizer supplied with chamber rack, 4 large trays, tray holder, drain tube, USB drive	

## DENTRI<sup>max</sup>

### 3D Imaging

MAX 18x16.5 cm FOV, perfect for capturing most maxillofacial structures

### Bitewings

Extraoral bitewing images for better patient comfort

### Model Scan Option

Model CBCT Scan for STL extraction

### PANO with Autofocus

2D panoramic feature with Autofocus for minimized distortion

### Cephalometric X-ray(optional)

Optional cephalometric arm attachment, excellent diagnostic images for orthodontic practice

### ✓ Field of View

Expansive FOV 18x16.5 cm maximizes your practice. Dentri Max provides you with various FOV size options from 3x3 cm to 18x16.5 cm

Free FOV  
(3x3 cm - 12x9 cm)

16x9 cm  
Dental Arch mode

18x16.5 cm  
Dental Arch mode

18x16.5 cm  
Airway Analysis

18x16.5 cm  
3D Cephalometric analysis

### ✓ Low Dose Radiation

An additionally equipped filter & Adaptive Exposure Control(AEC) technology significantly reduces radiation exposure. HDX WILL's imaging reconstruction still allows superior image quality.

Standard PANO  
CBCT scan with only HALF the dose of PANO scan  
\*16x9 cm FOV with Ultra Low Dose & AEC ON

### Adaptive Exposure Control(AEC)

### ✓ Superior Image Quality

HDX WILL's state of the art imaging reconstruction algorithm finds the best value of each voxel and enhances image contrast and sharpness.

### ✓ PrecisionMAR

PrecisionMAR™ offers unprecedented clarity around metal, improving diagnostics and planning.

- Minimal scatter
- Reduced shading artifact
- Clearly define bone and teeth structures around metal

## CBCT Panoramic Imaging FOV 16.5 x 18

### Dedicated 2D Panoramic X-ray

**Auto Focus**  
Minimized distortion,  
Maximized ability to  
obtain clear images

**Bitewings**  
Extraoral Bitewing  
options

**TMJ**  
TMJ diagnostic x-ray

**Low Dose Mode**  
Rapid scan time,  
Minimized dosage to  
patient

### Auto Focus

Auto Focus OFF

Auto Focus ON

### Bitewings

### TMJ

### Cephalometric X-ray(Optional)

Various cephalometric x-ray options with auto landmark tracing feature\*. Scan type & One-shot type available.

\*Auto Tracing - Available with Willceph software purchase.

Function	CBCT + PANORAMA + Cephalometric X-ray(Scan type, Optional) + Model Scan + 3D Ceph Module
Focal Spot	0.5 mm
Scan Time	CBCT: 8 s or 12 s, 24 s, 36 s Panorama: 14 s or less / Bitewings: 8 s or less / TMJ: 6 s or less Cephalometric X-ray(Optional): 8 s or less(Scan Type) / 0.5 s ~ 2 s (One-Shot Type)
FOV size(DxH)	18 × 16.5 cm(Stitch), 16 x 9 cm(Non-Stitch), Free FOV (min. 3 × 3 cm)
Voxel Size(CT)	0.1 - 0.3 mm
Tube Voltage	60 kV - 90 kV
Tube Current	4 mA - 10 mA
Dimension(WxDxH)	DENTRI Max: 1201 mm × 1361 mm × 2455 mm (47.3" × 53.6" × 96.7") DENTRI C MAX: 1999 mm × 1361 mm × 2455 mm (78.7" × 53.6" × 96.7") DENTRI S MAX: 1941 mm × 1361 mm × 2455 mm (76.4" × 53.6" × 96.7")

### 3D Imaging

MAX 16x9 cm FOV, perfect for capturing dentition, sinus, or TMJ

### Bitewings

Extraoral bitewing images for better patient comfort

### Model Scan Option

Model CBCT Scan for STL extraction

### PANO with Autofocus

2D panoramic feature with Autofocus for minimized distortion

### Cephalometric X-ray(optional)

Optional cephalometric arm attachment, excellent diagnostic images for orthodontic practice

Focal Spot	0.5 mm
Scan Time	CBCT: 8 s or 12 s, 24 s Panorama: 14 s or less / Bitewings: 8 s or less / TMJ: 6 s or less Cephalometric X-ray(Optional): 8 s or less(Adult) / 6 s or less(Child)
FOV size(DxH)	16x9 cm or 12x9 cm, 10x8 cm(Child), Free FOV (Min. 3x3 cm)
Voxel Size(CT)	0.1 - 0.3 mm
Tube Voltage	60 kV - 90 kV
Tube Current	4 mA - 10 mA
Dimension(WxDxH)	Eco-X: 980 mm × 1225 mm × 2314 mm(38.6 "× 48.3 "× 91.1 ") Eco-X S:1802 mm × 1225 mm × 2314 mm(71 "× 48.3 "× 91.1 ")

## Fast Response High Image Quality

- CSI Scintillator
- High Resolution
- Advanced Image Processing Algorithm
- Easy to Use
- Increased Patient Comfortableness and Ergonomic Design
- Easy Connection Using Twain Driver.

DIGITAL INTRAORAL IMAGE SENSOR

REVOLUTION IN  
MEDICAL DEVICES

## Intraoral Sensor 42 x 30 or 39 x 25

Product packaging

Waterproof

Easy USB Connection

**SENSOR**  
Fast Response  
High Image Quality

## FEATURES

### Image Quality

- Less graininess - Enhanced image
- Contrast resolution - Best at the penny test
- Spatial Resolution - 19-micron pixel size

### Patient Comfort

- Ergonomic Design with round corners - 6.0mm radius
- Thin Sensor Plate - 5.4mm (less than 1/4")
- Low Profile Button - 6.0mm

### Designed for Durability

- Thinner Cord - Direct USB from sensor plate to computer
- Sturdier Cord Jacket - Fewer wires enables greater protection
- Protected Against Fluids / Contaminants - Sealed cord / sensor junction
- Repair Option - Cord serviceability

### Ergonomic Design

- Broad Range of Acceptable Exposure - Superior electronic gain control
- Sang-Resistant Cord - No interface box or cord bulge
- Easy Cleaning - Immiscible in glutaraldehyde and other disinfectants

## SPECIFICATION

Parameter	IoDS-2401	IoDS-2402
Dimension (mm)	39 x 25	42 x 30
Image size (mm)	30 x 20	34 x 26
Image resolution (lp/mm)	25	
Pixel size (μm)	20	
Pixel pitch (μm)	20	
Total pixels (px)	1.5M	2.2M
Effective pixels (px)	1000 x 1500	1300 x 1700
Sensor technology	CMOS with Optical Fiber	
Scintillator	CsI (TI)	
Interface	USB 2.0 high speed	
Frame rate (fps)	1.4	1

The **lightest** The **Smallest**  
The **highest performance** of 70kV  
**Safe & Easy** to use

**REMEX**

 **High Quality  
Portable X-Ray Digital Camera**

- Conveniently transportable anywhere: office, surgery suites, humanitarian work  
Easily take an x-ray anytime during procedures
- No cumbersome stands or cables
- Cordless, rechargeable batteries. More than 250 exposures per charge
- Lightweight, highly convenient. No motion artifacts; blur-free radiographs

Remex provides the best diagnostic imaging

REVOLUTION IN  
MEDICAL DEVICES

## Handheld X-Ray Camera

### Convenient

Light weight, cordless, easily transportable  
No awkward arms to manipulate; no drift  
No need for special stands, cables, remotes  
Hundreds of diagnostic quality images from a single battery charge

### Sharp, clear images

Works with sensors, film, phosphor plates  
0.4 mm focal spot produces sharp, high-resolution images

### Safety

Low patient dosage  
Internal shielding protect the operator  
Studies show yearly operator exposure is equivalent to or less than exposure from a typical wall-mounted x-ray

**REMEX**  
High Quality  
Portable X-Ray Digital Camera
